Education

Advanced Vocational Training in "Web Application Development (DAW)"
- Technical training in web development, including frontend, backend, databases, object-oriented programming, UML diagrams, class diagrams, and use case diagrams.
- Technologies: HTML, CSS, JavaScript, jQuery, PHP, Java, SQL, XML, JSON, JSP

I.E.S. Ribera de Castilla (Valladolid, Spain)
2015-17

Experience

Frontend Developer (Angular)
Fourvenues
2023 – 25
Madrid, Spain

- Migration of a **B2B SaaS 360 management product for nightclubs**, used by over **300 clients**, including **Pacha and Jowke**.
  - The migration was from a **monolithic PHP solution** (developed as an MVP and not scalable) to a **modern architecture** with an **Angular frontend** (with SSR) and a **Node.js backend**, maintaining the **existing database** to preserve customer data.
  - This resulted in a significant improvement in the app's **maintainability**, **performance**, and **scalability**, facilitating the development and implementation of new **features**, new **designs**, and **SEO** improvements.
- Collaboration with the backend and design teams to define APIs, user flows, and technical decisions.
- Development of the new **corporate website**, prioritizing **performance** and **SEO**. Implementation of **tagging for analytics**.

Technologies: Angular, TypeScript, RxJS, Tailwind, PrimeNG, Angular Material, Jasmine, Karma, Node.js, Docker

Web Developer (Full Stack, focus on Frontend)
Pointer Digital
2019-23
Madrid, Spain

- Creation of **corporate websites** and **online stores** for **SMEs**.
- Involvement in the **entire software lifecycle**: from client meetings to define needs and technical specifications, through design, development, SEO, publishing, maintenance, and SEM campaigns.

Technologies: HTML, CSS, JavaScript, PHP, WordPress, Google AMP

Full Stack Web Developer
Astibot Engineering and Robotics
2017-18
Valladolid, Spain

- **Design** and **development** of apps for diverse clients: HR management, inventory and incident management system, document management system with uploads and downloads, social network for freelancers, e-commerce platform, and senior living facility management system.
- **Client** communication. **Budget** preparation.

Technologies: HTML, CSS, JavaScript, PHP, CodeIgniter, Symfony, Angular, Java, Swift, .NET

Full Stack Web Developer and Assistant to the Director
The Greater Chernobyl Cause (NGO)
2017
Cork, Ireland

- Complete **migration** and **redesign** of the corporate website from an old **PHP** site to a **WordPress** site using the Avada theme.

Technologies: HTML, CSS, JavaScript · WordPress

Skills and Tools

Frontend Development
- Angular
- TypeScript
- RxJS
- NgRx
- HTML, CSS, JS

UI & Styling
- SASS
- Tailwind CSS
- Bootstrap
- Angular Material
- PrimeNG
- Figma

Code Quality
- Prettier
- ESLint
- Commit Hooks

Angular SSR & Backend
- Node.js
- Express JS

Deployment & CI/CD
- Docker
- GitHub Actions
- Firebase

Testing
- Jasmine
- Karma

Progressive Web Apps (PWA)
- Service Workers
- Background Sync
- Push Notifications
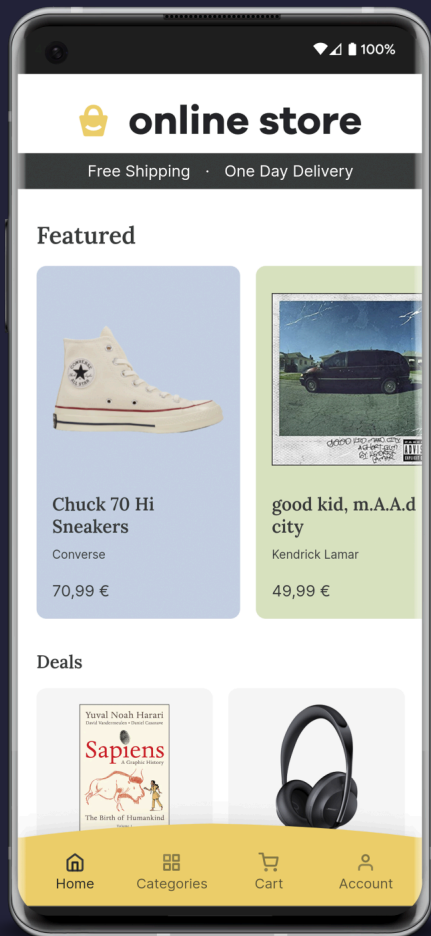

SEO & Google's Analytics
- Analytics
- Search Console
- Tag Manager

Portfolio

Online Store
App built with Angular and backend in PHP

- **Role**: Frontend Developer / Full Stack Developer / Designer
- **Technologies**: Angular 21, TypeScript, SSR, Firebase App Hosting, PHP, MySQL, Figma
- **Description**:
  - Full frontend development in **Angular** with server-side rendering (SSR) and using **NgRx** for state management.
  - Backend implementation in **PHP** with a **MySQL** database.
  - **Interface design** and Figma **prototyping** prior to development.
  - Architecture focused on **performance**, **SEO**, and **scalability**.
